**Raising interest for forest
products among students.**

Michaël RIVOIRE - Raising interest for forest products among students.

As a scientist and teacher,
how to interest students during their studies ?

~~“Learning, then manipulating.”~~

~~“Games are fun for young children !”~~

~~“PowerPoints® are great for courses.”~~

Thank you

✓ Let the students **manipulate**

before giving explanation !

✓ Use **interactive technologies**

as much as possible.

✓ A bad PowerPoint® is the best way to asleep people !
