

Get Your Glue Geek On at *Wood Adhesives!*

If you geek out on wood adhesives, or think that these photos are really interesting, you don't want to miss this conference!

Every 3-5 years, the bulk of the world's technical leaders in wood adhesives gather to discuss advances and challenges in the industry. This is the premier conference on wood adhesives, with more than 200 attendees, representing major companies and research institutions from around the world, more than 60% from industry. Whether you want to learn about the latest developments in bio-based raw materials, dig into industry trends, or get your test protocols to give you the answers you need, there is much to discuss. There will be enlightening talks from the world leaders in wood adhesive technology, with plenty of networking time to discuss your particular interests with your cohorts from around the world.

Join us **Sept 30 – Oct 2, 2020** in downtown Portland, Oregon: **Abstracts open till Feb 28**

Special Symposia

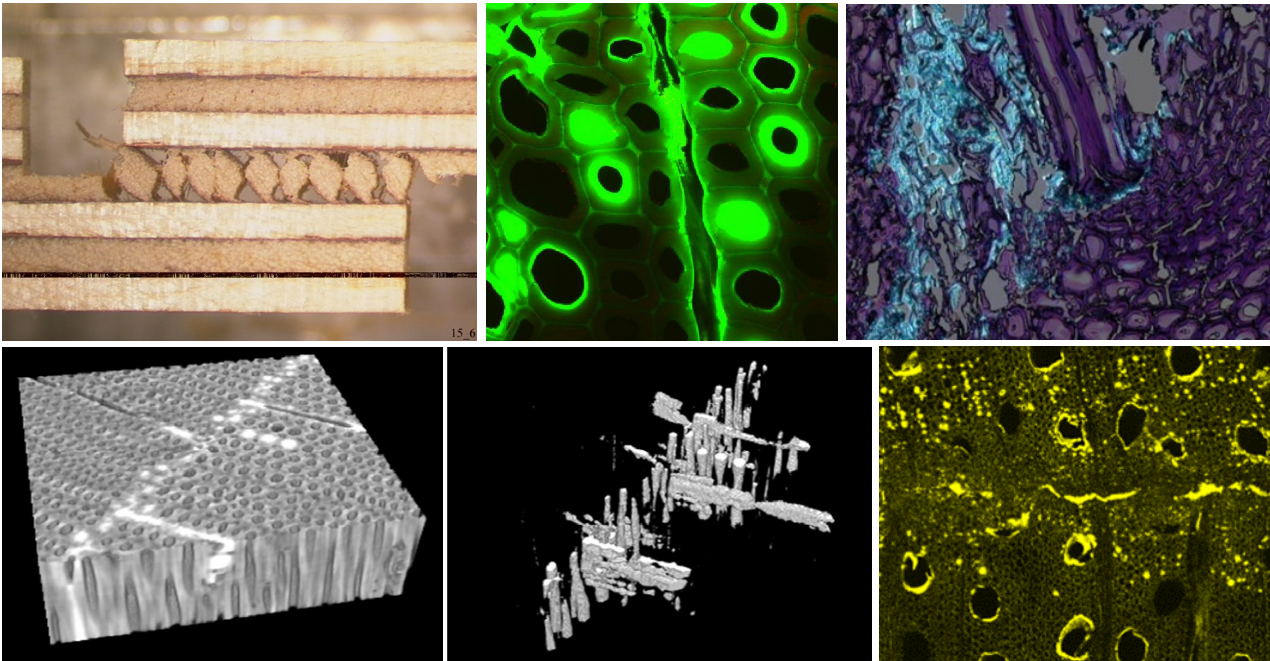

Mass Timber Manufacturing: Jinlan Ju, Kattera

Lignin in Adhesives: Jerry Gargulak, Borregaard, and Bob Narron, Lignotech USA

Progress in Established Adhesive Technologies: Manfred Dunky, Kronospan (Retired)

Protein Adhesives: Charles Frihart, FPL

VOC's from Adhesives: Shin-Ichiro Tohmura (FFPRI, Japan) and Venla Hemmilä (IKEA)

Top: Plywood shear, deep lathe checks pulled open; Green fluorescent PF in veneer; Light blue UF in particleboard.
Bottom: X-ray tomographic visualization of adhesive penetration, with and without wood shown; pMDI bondline.
Photo credits: Anti Rohumaa, Chris Hunt and Warren Grigsby, Hogger Elfriede, Joseph Jakes, Ning Yan
